The diagram illustrates a two-stage sampling process. At the top, a large rectangle is labeled 'N' and contains a smaller rectangle labeled 'n'. An arrow points from the 'N' rectangle to the 'n' rectangle. Below the 'n' rectangle is another rectangle labeled 'm'. An arrow points from the 'n' rectangle to the 'm' rectangle. This represents the selection of a sample of size 'n' from a population of size 'N', and then the selection of a subsample of size 'm' from that sample.
